

# A SOWING METHOD OF THE PLANT SEEDS AND THE SOWING MATERIALS USED THEREOF

## ABSTRACT OF THE DISCLOSURE

5 A sowing method of the plant seeds and the sowing materials used  
thereof is disclosed. The sowing method comprises the steps of a)  
providing a base with water-absorbing ability and humidity-maintaining  
ability, wherein the base includes a plurality of concavities, b) inlaying  
the plant seeds in the plural concavities of the base, and c) covering a  
10 cultivating material with the base, wherein each concavity has a void  
thereon for allowing a radicle of a corresponding plant seed to pierce  
therethrough and be rooted in the cultivating material while the  
corresponding plant seed is germinating. The base comprises light-  
blocking material for preventing the weeds from growing and is selected  
15 from a group consisting of a mulching paper, a fabric, a fiber and a  
polymer with natural decomposing ability. Therefore, the steps of  
sowing, soil-covering and weed-removal for agricultural production can  
be proceeded simultaneously and thus the cost is lowered.
